SELER SKN

AESTHETIC INSTITUTE

Module 2

Upper Face: Forehead, Glabella, Crows Feet/Lateral Canthal lines, Bunny lines/Nasalis

After completing this module, you will be able to:

- Determine the patient's concern and how to explain the treatment plan to patient
- Properly treat any single area or the upper face as a whole
- Determine if you need to treat an additional area to achieve success
- Determine how much Botox and where to place it for maximum cosmetic results without dropped or heavy brows occurring
- Reduce lines in forehead without affecting the brow area
- Determine if patient has the ability to get a brow lift from the procedure
- Properly treat lateral crows feet and bunny lines

Develop a Treatment Plan

- What concerns you and what would you like to see improved?
- Assess muscle strength not just number of wrinkles
- Deeper lines at rest require a longer period of relaxation to diminish
- Number of treatments depends on the depth of lines and time needed to relax and remodel skin
- Treatment dose depends on muscle strength

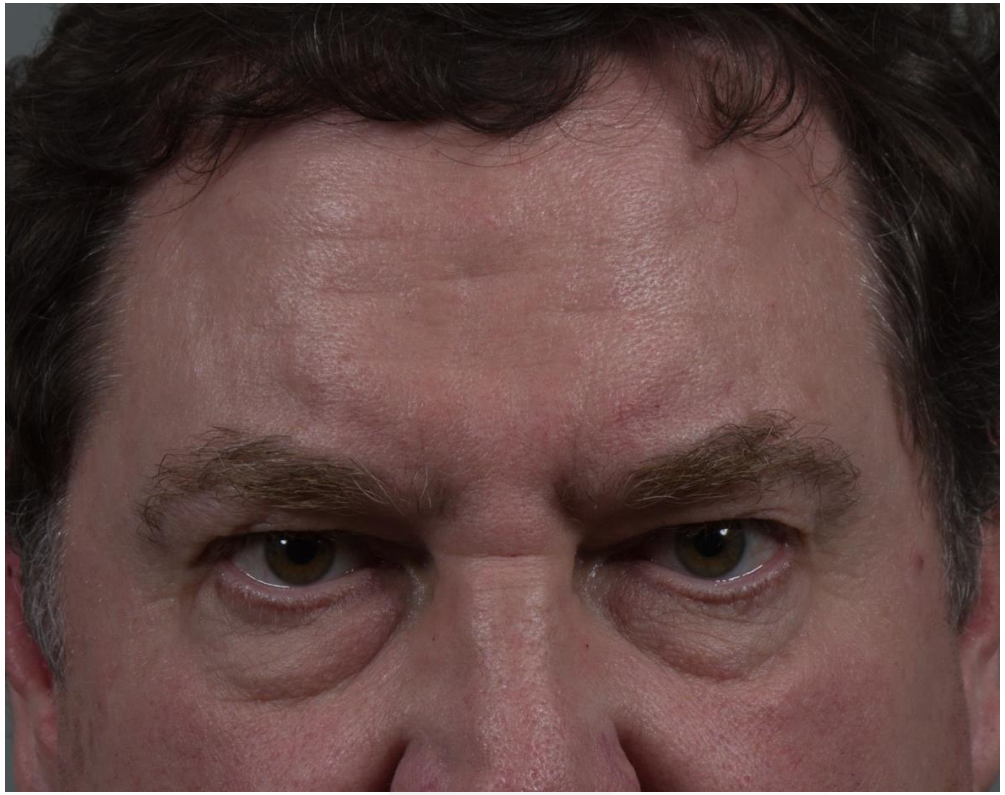
Everyone is Different – Manage Expectations



Patient at rest

Patient at flex

SELER SKN
AESTHETIC INSTITUTE

Treating Other Areas

Patient only concerned with forehead

Patient only concerned with glabella

SELER SKN
AESTHETIC INSTITUTE

Heavy Brow

Patient with heavy brow

Patient with horizontal wrinkling

SELER SKN
AESTHETIC INSTITUTE

Lateral Forehead

Patient needs brow lift

Patient at flex

SELER SKN
AESTHETIC INSTITUTE

Brow Lift Approach

SELER SKN
AESTHETIC INSTITUTE

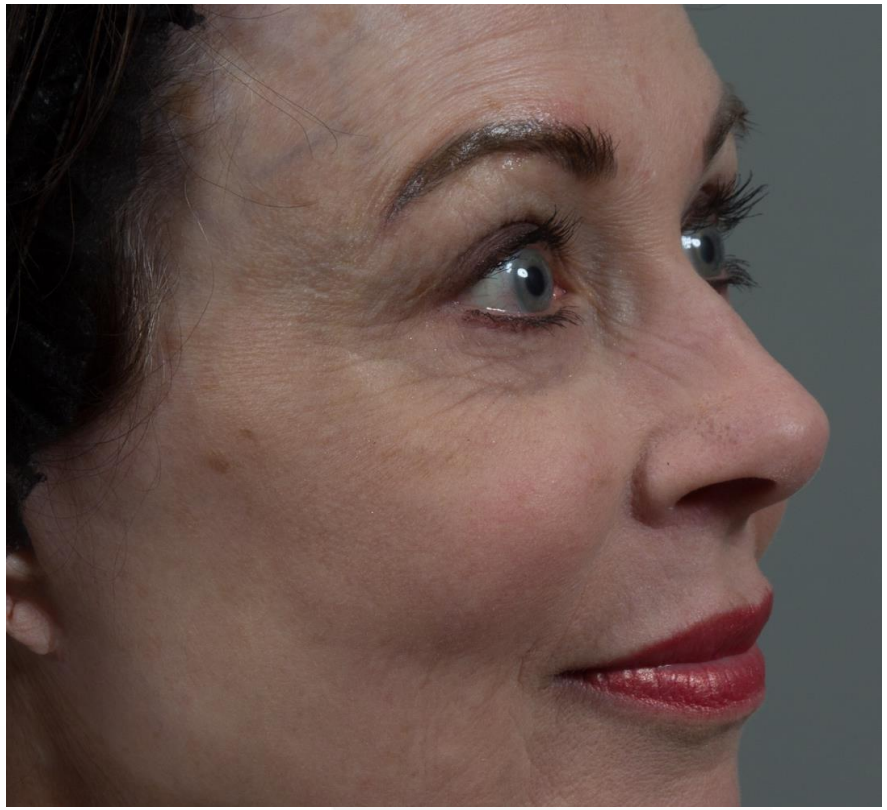
Spock Brow

Patient with spock brow

Patient with spock brow

SELER SKN
AESTHETIC INSTITUTE

Crow’s Feet



Patient barely squinting

Patient with high and low movement

SELER SKN
AESTHETIC INSTITUTE

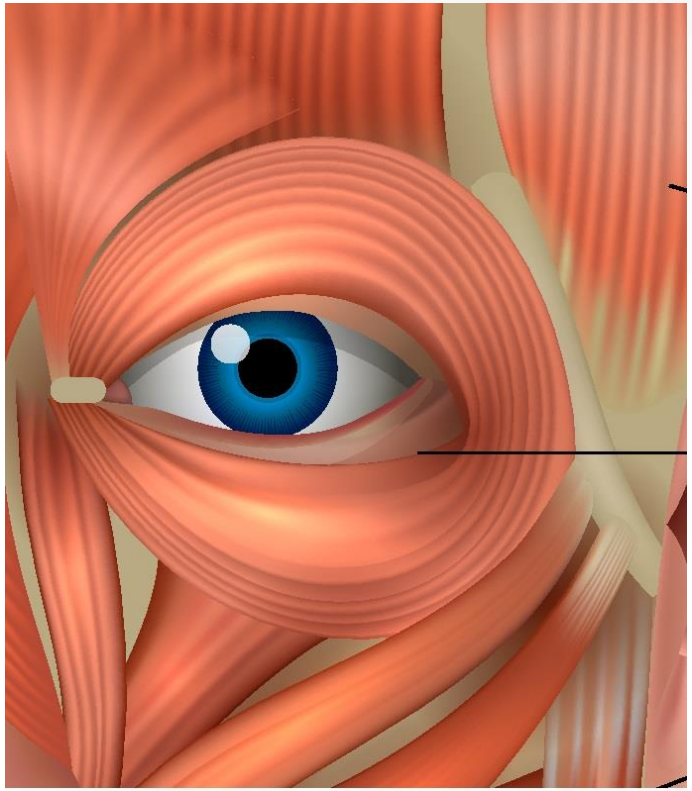
Crow’s Feet

Patients showing crows feet with a big smile

SELER SKN
AESTHETIC INSTITUTE

Pretarsal Orbicularis

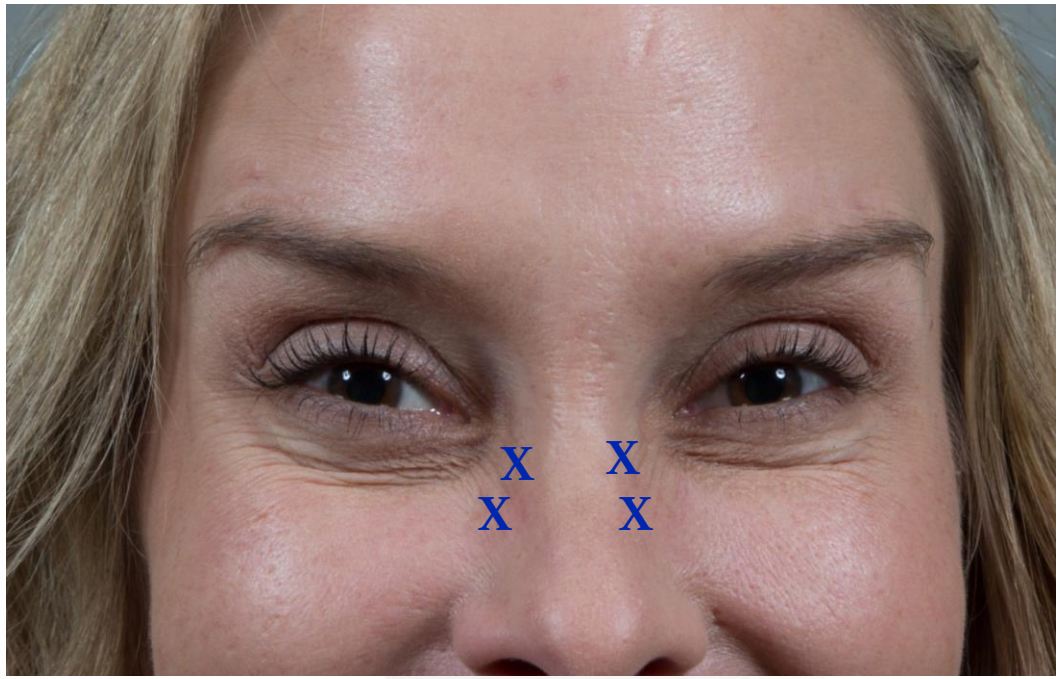
Patient “pinching” eyes



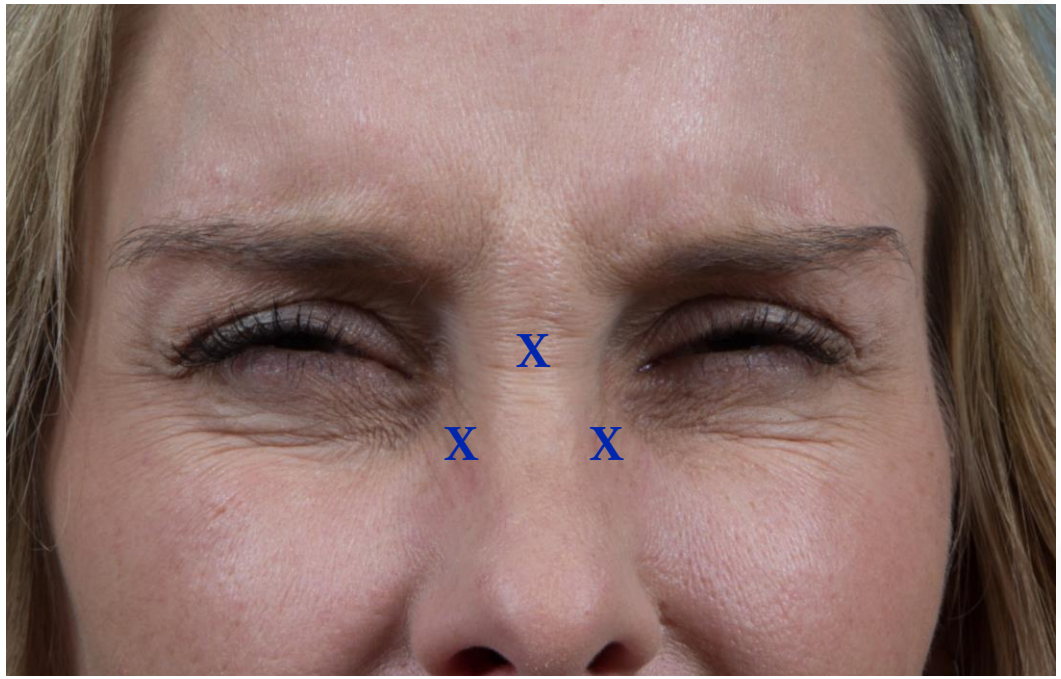
Pretarsal orbicularis

SELER SKN
AESTHETIC INSTITUTE

Nasalis Lines



Patient at flex



Patient at flex

SELER SKN
AESTHETIC INSTITUTE

Summary

- Communicate Conservative Plan
- Educate the Patient, discuss possibilities, set expectations
- Assess and understand where to inject ensures ability to correct
- Can Always Do More
